See how the workflow can significantly improve your bottom line through use of a comprehensive color management suite and expand your traditional 4-color with MC7, KCMY+OGV process.

Improve your press to proof color match by over 30% minimizing prepress/pressroom inefficiencies and color matching over 90% of the Pantone Plus coated library for improved combination (gang) runs and resulting improved profitability. Finally, see how this fits into a complete Prinect workflow enabling seamless transfer of jobs in a modern and efficient manner.

HEIDELBERG

Joseph is a 25+ year veteran in the quality printing & packaging industries, serving as Technical Services Manager, Prepress/Quality Services Manager for top 100 Commercial and Packaging firms in Greater New England. He earned a Master of Science Degree from Rochester Institute of Technology in Cross Disciplinary Professional Studies with concentrations in Business, Marketing and Color/Imaging Sciences.
