Reserve early, space is limited.

Since 1945, Cassel has served the local business community. While Cassel began as a sign shop, they now focus on vehicle wraps, allowing companies to “drive their brand.”

The Manheim-based company, which also has a location in Smoketown, is committed to quality. Their process includes wide format UV inkjet printers which are environmentally friendly and highly durable. All pieces are laminated prior to installation. Cassel provides cut vinyl in addition.

Cassel has offered full design services. They understand every client's situation is unique, but their goal is always the same—for their design of the vehicles and signage to represent their clients in the most effective way possible. Their creative team combines top-notch experience with a proven track record of fresh and relevant designs.

In addition to producing great work, Cassel is also a great culture when each team member is valued and plays a unique role in this unique business!
